granted approval to a UAE-based company for the acquisition of two entities engaged in the establishment and operation of an LNG terminal, as well as, the import, storage, and distribution of Liquefied Natural Gas (LNG) and Re-gasified Liquefied Natural Gas (RLNG) in Pakistan.

CCP has processed the two mergers, approving the 100% acquisition of Tabeer Energy (Private) Limited and Tabeer Energy Marketing (Private) Limited (TEMPL) by the UAE-based Bison Energy FZCO.

CCP completed the Phase-I competition assessments, conducted in accordance with Section 11 of the Competition Act, 2010. As the proposed transactions did not raise any competition concerns, the mergers were approved.

As a result of the merger transactions, Bison Energy FZCO has acquired 100% shareholding of Tabeer Energy (Private) Limited and Tabeer Energy Marketing (Private) Limited from Diamond Gas International Japan Co. Limited. The transaction will result in foreign direct investment in Pakistan and help alleviate the gas shortage.

UAE company allowed to acquire two energy firms

By Our Staff Reporter

ISLAMABAD: The Competition Commission of Pakistan (CCP) has given the green light to two mergers paving the way for foreign direct investment (FDI) and the potential mitigation of Pakistan's gas shortage.

The CCP has granted a UAE-based company approval for the acquisition of two entities engaged in the establishment and operation of an LNG terminal, as well as the import, storage, and distribution of Liquefied Natural Gas (LNG) and re-gasified liquefied natural gas (RLNG) in Pakistan.

The watchdog approved the 100 per cent acquisition of Tabeer Energy (Pvt) Ltd (TEPL) and Tabeer Energy Marketing (Pvt) Ltd (TEMPL) by the UAE-based Bison Energy FZCO.

It has completed the phase-1 competition assessments, conducted as per Section 11 of the Competition Act 2010. As the proposed transactions did not raise any competition concerns, the mergers were approved.

As a result of the merger transactions, Bison Energy has acquired the entire shareholding of TEPL and TEMPL from Diamond Gas International Japan Co Ltd.

- The CCP says the decision will attract more foreign direct investment, ensure the potential mitigation of gas shortage
- The local companies set up and operated an LNG terminal and were involved in the import and distribution of the gas

KARACHI: The Competition Commission of Pakistan (CCP) decided to greenlight the acquisition of two local companies engaged in the establishment and operation of a Liquefied Natural Gas (LNG) terminal by a firm based in the United Arab Emirates (UAE) on Saturday. The CCP is an independent regulatory authority responsible for promoting fair competition and protecting consumers from anti-competitive practices.

According to an official statement, it took the decision to attract more foreign direct investment (FDI) and ensure the potential mitigation of gas shortages in Pakistan.

It said the two local companies were also involved in the import, storage, and distribution of LNG and Re-gasified Liquefied Natural Gas (RLNG) in the country.

“CCP has processed the two mergers, approving the 100 percent acquisition of Tabeer Energy (Private) Limited and Tabeer Energy Marketing (Private) Limited by the UAE-based Bison Energy FZCO,” the statement continued.

“CCP completed the Phase-1 competition assessments, conducted in accordance with Section 11 of the Competition Act, 2010,” it added. “As the proposed transactions did not raise any competition concerns, the mergers were approved.”

The UAE-based company has now acquired the complete shareholding of the two business entities from Diamond Gas International Japan Co. Limited.

“The transaction will result in foreign direct investment in Pakistan and help alleviate the gas shortage,” the statement said.

Pakistan has faced a number of energy-related issues, including gas shortages, in recent years. These include the increasing demand slow pace of the supply, especially in winter when its usage intensifies for heating purposes. (<https://arab.news/wemwe>)

PR No.252 CCP APPROVES TWO MERGERS FACILITATING FDI INFLOW Islamabad: September 30, 2023

The Competition Commission of Pakistan (CCP) has given the green light to two mergers, paving the way for Foreign Direct Investment (FDI) and the potential mitigation of Pakistan's gas shortage. CCP has granted approval to a UAE-based company for the acquisition of two entities engaged in the establishment and operation of an LNG terminal, as well as the import, storage, and distribution of Liquefied Natural Gas (LNG) and Re-gasified Liquefied Natural Gas (RLNG) in Pakistan. CCP has processed the two mergers, approving the 100% acquisition of Tabeer Energy (Private) Limited and Tabeer Energy Marketing (Private) Limited (TEMPL) by the UAE-based Bison Energy FZCO. CCP completed the Phase-1 competition assessments, conducted in accordance with Section 11 of the Competition Act, 2010. As the proposed transactions did not raise any competition concerns, the mergers were approved. As a result of the merger transactions, Bison Energy FZCO has acquired 100% shareholding of Tabeer Energy (Private) Limited and Tabeer Energy Marketing (Private) Limited from Diamond Gas International Japan Co. Limited. The transaction will result in foreign direct investment in Pakistan and help alleviate the gas shortage.

CCP greenlights two mergers to boost foreign investment

By Mehtab Haider

ISLAMABAD: The Competition Commission of Pakistan (CCP) has approved two mergers, which are poised to make way for Foreign Direct Investment (FDI) and potentially alleviate Pakistan's gas scarcity.

One of these mergers involves a United Arab Emirates-based company acquiring two entities responsible for managing a Liquefied Natural Gas (LNG) terminal, along with the import, storage, and distribution of LNG and re-gasified LNG in Pakistan.

The CCP has thoroughly reviewed and processed the merger, which entails the UAE-based Bison Energy FZCO acquiring a full 100% stake in Tabeer Energy (Private) Limited and Tabeer Energy Marketing (Private) Limited (TEMPL).

It completed the Phase-1 competition assessments, conducted in accordance with Section 11 of the Competition Act, 2010. As the proposed transactions did not raise any competition concerns, the mergers were approved.

As a result of the merger transactions, Bison Energy FZCO has acquired 100% shareholding of Tabeer Energy (Private) Limited and Tabeer Energy Marketing (Private) Limited from Diamond Gas International Japan Co Limited. The transaction will result in foreign direct investment in Pakistan and help alleviate gas shortages.

Tender launched for LNG spot cargoes

Earlier this week, Pakistan launched a fresh tender for LNG spot cargoes to meet its winter demand, after failing to secure supplies from the global market for over a year due to high prices and low availability.

The Pakistan LNG Limited (PLL), a state-owned company, said on Wednesday it was seeking bids from international suppliers for two LNG cargoes of 140,000 cubic meters each, to be delivered in December at Port Qasim in Karachi.

The delivery windows are December 7-8 and December 13-14, according to the tender document. PLL has the mandate to procure LNG on behalf of the federal government to meet the country's gas requirements through two LNG import terminals with exclusive arrangements for public sector distribution.

The delivery from the volatile spot market has been an uphill task for Pakistan since the start of the war between Ukraine and Russia in April 2023. Previous attempts to buy LNG proved futile mainly due to the lukewarm response of sellers. The growing concern of suppliers about the country's credit risk has been another headache for a country already plagued by chronic energy shortages.

LNG is crucial for Pakistan, where natural gas accounts for over a third of power generation and local gas reserves are insufficient to address growing electricity demand in a country of over 230 million.

TWO LOCAL LNGs COMPANIES NOW BELONG TO UAE

Pakistan's competition commission approves UAE-based firm's acquisition of two local LNG companies

The Competition Commission of Pakistan (CCP) decided to greenlight the acquisition of two local companies engaged in the establishment and operation of a Liquefied Natural Gas (LNG) terminal by a firm based in the United Arab Emirates (UAE) on Saturday.

The CCP is an independent regulatory authority responsible for promoting fair competition and protecting consumers from anti-competitive practices. According to an official statement, it took the decision to attract more foreign direct investment (FDI) and ensure the potential mitigation of gas shortages in Pakistan.

It said the two local companies were also involved in the import, storage, and distribution of LNG and Re-gasified Liquefied Natural Gas (RLNG) in the country. "CCP has processed the two mergers, approving the 100 percent acquisition of Tabeer Energy (Private) Limited and Tabeer Energy Marketing (Private) Limited by the UAE-based Bison Energy FZCO," the statement continued. "CCP completed the Phase-1 competition assessments, conducted in accordance with Section 11 of the Competition Act, 2010," it added. "As the proposed transactions did not raise any competition concerns, the mergers were approved."

The UAE-based company has now acquired the complete shareholding of the two business entities from Diamond Gas International Japan Co. Limited. "The transaction will result in foreign direct investment in Pakistan and help alleviate the gas shortage," the statement said.

Pakistan has faced a number of energy-related issues, including gas shortages, in recent years. These include the increasing demand slow pace of the supply, especially in winter when its usage intensifies for heating purposes. Additionally, the existing gas infrastructure in the country is outdated and leads to significant loss of gas during transmission.

Pakistan has also been seeking more FDI to financially strengthen itself amid an ongoing economic crisis that prompted its successive administrations to seek International Monetary Fund (IMF) bailouts to mitigate dollar liquidity crunch.

UAE's Bison Energy Acquires Pakistani LNG Firms: A Potential Solution to Pakistan's Gas Crisis

By Rizwan Shah

In a significant move for Pakistan's energy sector, the Competition Commission of Pakistan (CCP) has given its stamp of approval to two major mergers. These mergers, involving UAE-based Bison Energy FZCO and two local LNG companies, are expected to herald a wave of Foreign Direct Investment (FDI) into the country and potentially alleviate Pakistan's ongoing gas shortage.

The CCP has greenlit a UAE-based organization, Bison Energy FZCO, to acquire two critical entities engaged in the establishment and operation of a Liquefied Natural Gas (LNG) terminal. The companies, Tabeer Energy Private Limited and Tabeer Energy Marketing Private Limited (TEMPL), are also involved in the import, storage, and distribution of both LNG and Regasified Liquefied Natural Gas (RLNG) within Pakistan.

These approvals mark the successful completion of Phase 1 competition assessments, meticulously conducted in accordance with Section 11 of the Competition Act, 2010. The proposed transactions were found to raise no competition concerns, leading to the approval of these mergers. Consequently, Bison Energy FZCO has now secured full shareholding of both Tabeer Energy Private Limited and Tabeer Energy Marketing Private Limited. Bison acquired these companies from Diamond Gas International Pte Ltd (DGI), a wholly-owned LNG marketing arm of the larger Mitsubishi Corporation, Japan.

This development is poised to inject significant foreign direct investment into Pakistan's energy sector, addressing the pressing issue of gas shortage that has been plaguing both industry and households. Pakistan has been facing an uphill task to secure LNG supplies from the global market for over a year due to high prices and low availability. This has been exacerbated by the ongoing Ukraine and Russia war that started in April 2023.

With natural gas accounting for over a third of power generation in Pakistan, and local gas reserves insufficient to address the growing electricity demand in a country of over 230 million, the importance of securing consistent LNG supplies cannot be overstated. This merger, therefore, marks a significant step towards ensuring energy security in Pakistan.

The acquisition by Bison Energy FZCO represents a substantial injection of Foreign Direct Investment (FDI) into Pakistan. This is expected to boost the country's energy infrastructure and attract future foreign investments, paving the way for a more sustainable and robust energy future.

FDI is a crucial element in the economic development of emerging economies like Pakistan. It not only brings in capital but also facilitates the transfer of skills, knowledge, technologies, and managerial know-how, which can lead to economic growth and development. This merger could therefore serve as a catalyst for further FDI inflows into Pakistan, particularly in the energy sector.

While the road to energy security in Pakistan is far from smooth, with numerous challenges including geopolitical tensions, high global LNG prices, and domestic supply-demand imbalances, the approval of these mergers represents a positive step forward.

The entry of Bison Energy into Pakistan's LNG market could provide much-needed stability and reliability in the supply of LNG, thereby helping to alleviate the country's gas shortages. This, coupled with the prospect of increased FDI, paints a more hopeful picture for the future of Pakistan's energy sector.
